

**Worldwide technology leader from East Westphalia
Family-owned business in Bielefeld!**

PLC programmer for complex machines and plants

Our client is an innovative medium-sized, family-owned business based in Bielefeld and is a worldwide supplier of highly complex production lines. These are used for the mass production of consumer goods. With a long and rich company history, our client is proud of its tradition, values and sustainable success. The basis for this is the expertise, the high quality standards, and the strong orientation towards the needs of its customers. Due to the strong growth, our client is currently looking for a PLC programmer who would like to develop both personally and professionally as well as to help the company forward and develop the cutting-edge technologies of tomorrow.

After intensive on-the-job training, you will take over the software development of our machines and systems and their commissioning, in other words from the initial planning and project planning up to the final acceptance. You will work closely with all project participants during the individual phases of the project. You will also be responsible for training the machine operators and preparing the necessary documentation. Outside the project business, you optimise or upgrade existing machines and systems and support the service staff with your extensive professional knowledge.

- Project planning of the entire control system
- PLC programming incl. user interfaces
- Commissioning
- Training of machine operators
- Service support

After successfully completing a degree in electrical engineering, mechatronics or comparable training (master craftsman, technician, PLC specialist, etc.) you ideally will have gained practical experience in PLC programming. You are able to familiarise yourself with complex manufacturing processes and have sound knowledge of special mechanical engineering and automation technology. Working in a team is an enrichment for you, at the same time you attach great importance to freedom in your work design. You are ready to travel worldwide and have a good command of English. With your competence and your courage to develop something new, you make a decisive contribution to ensuring the long-term success of the company.

- Completed degree in electrical engineering or mechatronics
- Knowledge of S7 or TwinCat
- Experience in special machine construction
- Willingness to travel globally
- Ability to work effectively in a team
- Good command of English

If this challenging, varied task with very good development opportunities appeals to you, then we look forward to getting to know you! We offer you an innovative, financially strong company with a very good, informal working atmosphere and offer an attractive compensation package. Please send your complete application documents by email stating the reference number **AS313H** to the personnel consultancy vietenplus commissioned by us, attn. Mr Schneider, bewerbung@vietenplus.de. Ms Richter and Ms Fischer will be happy to answer any of your initial questions by telephone on +49 (0)4102-66725-0. **Confidentiality is guaranteed.**
